List of Contents

NUMBER 1

J. Abdallah Jr, A. Ya Faenov, T. A. Pikuz, M. D. Wilke, G. A. Kyrala and **R. E. H. Clark**	1	Hot electron effects on the satellite spectrum of laser produced plasmas
D. V. Kalinin, D. K. Bronnikov, Yu. G. Selivanov, T. Gabard, J.-P. Champion and **J.-C. Hilico**	13	Measurement of rotational relaxation in the ground state of methane perturbed by argon at low temperature
R. J. Wells	29	Rapid approximation to the Voigt/Faddeeva function and its derivatives
C. Tezcan, A. Kaşkaş and **M. Ç. Güleçyüz**	49	The singular eigenfunction method: the Milne problem for isotropic and extremely anisotropic scattering
Fang Quanyu, Cai Wei, Zou Yu, Li Ping and **Xu Zhijin**	59	Excitation collision strength and rate coefficient of Au^{q+} ($q = 47$–55) ions by electron impact
I. Martín, C. Hernando, C. Lavín and **A. M. Velasco**	71	Transition probabilities for singly ionized xenon
J. Abdallah Jr, R. E. H. Clark, A. Ya. Faenov, L. Karpinski, S. A. Pikuz, V. M. Romanova, M. Sadowski, M. Scholz and **A. Szydlowski**	85	Electron beam effects on the spectroscopy of multiply charged ions in plasma focus experiments
V. Sivakumaran, K. P. Subramanian and **V. Kumar**	97	The study of NO_2 lifetimes in the excitation wavelength 465–490 nm
S. Kato, T. P. Ackerman, J. H. Mather and **E. E. Clothiaux**	109	The k-distribution method and correlated-k approximation for a shortwave radiative transfer model
M. Korek	123	Non-integral expression for the relative intensities in infrared transitions of a diatomic molecule

NUMBER 2

R. Kling and M. Kock — 129 WI branching ratios and oscillator strengths

H. M. Park, T. H. Kim and J. H. Lee — 141 Dynamic simulation of thermal radiation in participating media by means of mode reduction

D. S. Balsara — 167 Linearized formulation of the Riemann problem for radiation magnetohydrodynamics

R. Schermaul — 181 Transition probability and line broadening for the $b^1\Sigma_g^+$ $(v = 0) \leftarrow X^3\Sigma_g^-$ $(v = 0)$ band of the $^{16}O^{18}O$ isotopomer of oxygen

P. G. J. Irwin, S. B. Calcutt, K. Sihra, F. W. Taylor, A. L. Weir, J. Ballard and W. B. Johnston — 193 Band parameters and k coefficients for self-broadened ammonia in the range 4000–11 000 cm^{-1}

N. Jacquinet-Husson, E. Arié, J. Ballard, A. Barbe, G. Bjoraker, B. Bonnet, L. R. Brown, C. Camy-Peyret, J. P. Champion, A. Chédin, A. Chursin, C. Clerbaux, G. Duxbury, J.-M. Flaud, N. Fourrié, A. Fayt, G. Granner, R. Gamache, A. Goldman, Vl. Golovko, G. Guelachvili, J. M. Hartmann, J. C. Hilico, J. Hillman, G. Lefèvre, E. Lellouch, S. N. Mikhaïlenko, O. V. Naumenko, V. Nemtchinov, D. A. Newnham, A. Nikitin, J. Orphal, A. Perrin, D. C. Reuter, C. P. Rinsland, L. Rosenmann, L. S. Rothman, N. A. Scott, J. Selby, L. N. Sinitsa, J. M. Sirota, A. M. Smith, K. M. Smith, Vl. G. Tyuterev, R. H. Tipping, S. Urban, P. Varanasi and M. Weber — 205 The 1997 spectroscopic GEISA databank

NUMBER 3

D. S. Balsara — 255 Exact Jacobians of Roe-type flux difference splitting of the equations of radiation hydrodynamics (and Euler equations) for use in time-implicit higher-order Godunov schemes

B. Su and **G. L. Olson** 279 Non-grey benchmark results for two temperature non-equilibrium radiative transfer

A. Djaoui 303 Time-dependent hydrogenic ionization model for non-LTE mixtures

J. Buldyreva, J. Bonamy and **D. Robert** 321 Semiclassical calculations with exact trajectory for N_2 rovibrational Raman linewidths at temperatures below 300 K

D. Marić and **J. P. Burrows** 345 Analysis of the UV absorption spectrum of ClO: a comparative study of four methods for spectral computations

J. D. Hey, C. C. Chu and **J. P. S. Rash** 371 Partial local thermal equilibrium in a low-temperature hydrogen plasma

NUMBER 4

A. Poquérusse and **S. Alexiou** 389 Fast analytic formulas for the modified Bessel functions of imaginary order for spectral line broadening calculations

A. S. Pine 397 Asymmetries and correlations in speed-dependent Dicke-narrowed line shapes of argon-broadened HF

S. Günter and **A. Könies** 425 Diagnostics of dense plasmas from the profile of hydrogen spectral lines in the presence of a magnetic field

J. A. M . Rojas, M. Ortiz and **J. Campos** 433 Experimental transition probabilities for lines arising from $3s^2 3p^2 4p$ configuration of single ionized sulfur

Notes

A. S. Pine and **C. P. Rinsland** 445 The role of torsional hot bands in modeling atmospheric ethane

H. M. Park, J. H. Lee and **J. H. Park** 459 Analysis of spectral radiative heat transfer in furnaces using an efficient computational technique

H. Kobayashi 477 Line-by-line calculation using Fourier-transformed Voigt function

S. Krishnakumar, B. J. Shetty, and **T. K. Balasubramanian** 485 Vibronic intensity distribution and isotope shifts in the $A^1\Pi$–$X^1\Sigma^+$ transition of germanium monosulfide: investigations using ^{70}Ge and ^{74}Ge enriched isotopes

M. Caldas and V. Semião 495 Modeling of optical properties for a polydispersion/gas mixture

M. E. Webber, R. M. Mihalcea, D. S. Baer, R. K. Hanson, J. Segall and P. A. DeBarber 511 Diode-laser absorption measurements of hydrazine and monomethylhydrazine

NUMBER 5

L. Pierrot, A. Soufiani and J. Taine 523 Accuracy of narrow-band and global models for radiative transfer in H_2O, CO_2, and H_2O–CO_2 mixtures at high temperature

P. Teulet, J. P. Sarrette and A. M. Gomes 549 Calculation of electron impact inelastic cross sections and rate coefficients for diatomic molecules. Application to air molecules

S. A. Tashkun, V. I. Perevalov, J-L. Teffo and VI. G. Tyuterev 571 Global fit of $^{12}C^{16}O_2$ vibrational–rotational line intensities using the effective operator approach

Notes

D. Mohan Rao 599 A numerical solution of the line transfer equation in a spherically symmetric atmosphere

L. Pierrot, P. Rivière, A. Soufiani and J. Taine 609 A fictitious-gas-based absorption distribution function global model for radiative transfer in hot gases

P. Quinet, P. Palmeri and E. Biémont 625 On the use of the Cowan's code for atomic structure calculations in singly ionized lanthanides

NUMBER 6

J. Z. Qiu, D. W. Fang, W. J. Xie and S. Zhang 647 Environmental radiation effect of atomic Rydberg states

L. Özdemir and H. Karal 655 Energy and oscillator strength calculations using H–F with relativistic corrections

L. B. Barichello and C. E. Siewert 665 A discrete-ordinates solution for a non-grey model with complete frequency redistribution

C. E. Siewert 677 A concise and accurate solution for a polarization model in radiative transfer

C. E. Siewert and S. J. Wright 685 Efficient eigenvalue calculations in radiative transfer

D. J. Strickland, J. Bishop, J. S. Evans, T. Majeed, P. M. Shen, R. J. Cox, R. Link and **R. E. Huffman** 689 Atmospheric Ultraviolet Radiance Integrated Code (AURIC): theory, software architecture, inputs, and selected results

Notes

J. D. Brancher, M. T. Vilhena and **C. F. Segatto** 743 The LTS_N solution for radiative transfer problem without azimuthal symmetry with severe anisotropy

E. M. Abulwafa and **M. T. Attia** 755 Integral form of radiative transfer equation in inhomogeneous cylindrical medium with anisotropic scattering

R. Hefferlin and **L. A. Kuznetsova** 765 Systematics of diatomic molecular transition moments
